

Assignment #2

Screen Scraping & OCR Text Recognition

Example of Automated Processing with Anchor Image:

<https://ui.vision/rpa/x/desktop-automation/screen-scraping>

Example Case for Complex Problem Solving (WP):

1. In one of the assignment, student need to carry out a programming task that can execute end-to-end process for Screen Scraping & OCR Text Recognition using Python Script. This topic is selected because it is part of the academia-industrial collaboration at MJIT. The main objective is to solve the industrial-based problem.
2. Process of Implementation:
 - ✓ You need to commit the source code via your github
 - ✓ Those groups (up to 2 person only) who manage to analyze, debug and solve this programming task will need to write a full report.
3. Outcomes:
 - ✓ Final Report and source code in Github.
 - ✓ Deadline for submission: 7th February 2023
